TEST CASES FOR TESTING GMAIL ATTACHMENT FUNCTIONALITY

Test Case: 001

Test Summary: Verify the functionality of the attach button in Gmail for attaching a file to an email.

Test Steps:

1. Open a web browser and navigate to the Gmail login page.
2. Log in to your Gmail account with valid credentials.
3. Click on the "Compose" button to create a new email.
4. In the new email composition window, locate and click on the "Attach files" button (paperclip icon).
5. Choose a file from your device by clicking on the "Choose file" button in the file attachment dialog.
6. Select a file and click on the "Open" button to attach it to the email.
7. Verify that the attached file is displayed in the email composition window.
8. Complete the email with a recipient, subject, and any additional content.
9. Click on the "Send" button to send the email.

Prerequisites:

1. A computer or device with a web browser.
2. Internet connectivity.
3. A Gmail account with valid login credentials.
4. A file (e.g., document, image, or any valid file format) for attachment.

Expected Results:

1. The file attachment dialog should open successfully.
2. The selected file should be attached to the email.
3. The attached file should be visible in the email composition window.
4. The email should be sent successfully.
5. The recipient should receive the email with the attached file.
6. The attached file should be downloadable and accessible by the recipient.
